from p. 1

Regional Hospital in Cavite and the Batangas Medical Center in Batangas. Kabilang rin sa network na ito ang ibang malalaking public hospitals sa probinsya ng Laguna, Quezon at Rizal upang magbigay ng kinakailangang health services sa ating kababayan lalo na sa mga positibo ng Covid virus. Kaya mayroon tayong well-coordinated response at referral system na syang namamahala sa ating mga Covid cases," Regional Director Eduardo C. Janairo stated.

"We all Covid-19 cases as Delta Variant cases and this is the reason why we initiated and established the "Project Delta" with the objective of preventing the immediate spread of the virus in high-risk communities."

Janairo also emphasized that Covid patients admitted in government health facilities in remote areas need not worry as they have been conducting telemedicine consultations since 2018. "Marami ng health facilities na nalagyan ng telemedicine services sa iba't-ibang malalayong probinsya and the most recent is the tele-icu system placed at Quezon Medical Center in Lucena City, to monitor critical Covid patient in intensive care units (ICU) which is also designed to protect health-care workers from possible infection due to less exposure."

As of September 16, 2021, the Regional Epidemiology and Surveillance Unit recorded 406 Delta Variants with Laguna having the highest number of cases at 112 followed by Cavite with 99 cases, Rizal with 83, Batangas – 65, Quezon – 33 and Lucena City with 14 cases.

Most source of Delta infection comes from local transmission with 355 cases with the largest number also from Laguna with 102 cases followed by Cavite with 82 cases, Rizal – 78, Batangas – 52, Quezon – 28 and Lucena City with 13 cases.

A total of 51 Delta cases came from Returning Overseas Workers (ROF) with Cavite topping the list with 17 cases followed by Batangas with 13, Rizal and Quezon with 5 cases each and Lucena City has one case.

Janairo said that the regional office continues to conduct mass antigen and RT-PCR testing to prevent transmission.

"Follow health protocols, for young children and senior citizens better stay indoors just to be safe and get vaccinated if you have not yet received your dose. It is better to have an additional protection than none at all," he reminded residents. **(GLEN RAMOS)**

Nagsimula ng mamahagi ng mga alagaing biik ang Pamahalaang Panlalawigan ng Batangas sa pangunguna ng Provincial Veterinary Office (ProVet) sa mga lugar sa lalawigan na idineklara nang ligtas sa African Swine Fever (ASF).

Ginawa ang programa para ayudahan ng pag-asa sa pagsisimula muli ng hanap-buhay ang may 720 mga mag-aalala ng baboy sa iba't-ibang bayan at lungsod na deklarado nang ASF-free, na naunang lubhang naapektuhan ng paglaganap ng pesteng sakit sa baboy.

Ilan sa mga benepisyaryo ay mga mag-aalaga sa mga bayan ng Taysan, San Jose, Nasugbu, Rosario at Malvar, at maging sa lungsod ng Lipa. Bukod sa mga biik, binibigyan din ang mga hog-raiser ng feeds, disinfectants, dewormer at mga bitamina mula sa Department of Agriculture - Livestock Division.

Tiniyak ni provincial veterinarian Dr. Rommel Marasigan na walang maiiwan sa muling pag-angat ng industriya sa pag-aalaga ng baboy sa lalawigan, na isinusulong na programa ni Governor DoDo Mandanas.

Nangako naman ang mga hog-raisers na mas pag-iibayuhin pa ang ginagawang Bantay ASF activities sa kani-kanilang lugar sa suportang ibinibigay ng Pamahalaang Panlalawigan para makabawi sa sinapit nilang pinsala.

Nauna nang idineklara ng International Training Center on Pig Husbandry (ITC-PH), na naka-base sa Lungsod ng Lipa na ang Batangas Province ang kauna-unahang lalawigan sa buong Pilipinas na ASF-free, matapos ang 16-na-buwang pagpapatupad ng mga hakbang upang matugunan ang naturang sakit ng baboy. **(Benjie J. received jabs of mRNA vaccines, like Moderna and Pfizer.

mRNA vaccines are a new type of vaccine developed to give protection against infectious diseases that teach human cells how to make a protein, or even just a piece of a protein that triggers an immune response inside the body. This immune response, which produces antibodies, will protect the vaccinee from getting infected if the real virus enters the body.

The studies revealed that the protection against Covid-19 and its variants was higher than the resistance provided by infection or vaccine alone.

Paul Bieniasz, a virologist at the Rockefeller University who prefers the term hybrid, rather than superhuman immunity said, "This is a phenomenon that we and others have uncovered in people who were infected by SARS-CoV-2 early in the pandemic, and then some months later when vaccines became available, they were vaccinated," according to Reuters report.

The antibodies were not only capable of neutralizing all of the SARS-CoV-2 variants that the study have seen thus far, but are also capable of neutralizing viruses that are very much more diverse, including the original SARS coronavirus, which is really quite different to the current ones, viruses that are currently circulating in bats and pangolins, Reuters report added.

Although the development offers hope for those who recovered from the disease and has been jabbed, researchers further urge the public to be circumspect as the research is still new and needs more physical global testing.

Also being subject of the ongoing research is the examination on the third booster shot if it has the same effect.

As this develop, humanity must brace itself as the World Health Organization has said another influenza pandemic is certain, a matter of when, not if.

Include non-medical staff in SRA and Hazard Pay... from p. 1

sa pambansang pamahalaan at sa mga lokal na mambabatas na unahing isama ang mga non-medical frontline staff na nagtatrabaho sa mga ospital at quarantine facilities sa bansa para kuwalipikadong makatanggap ng Special Risk Allowance (SRA), Hazard Pay, at iba pang mga pakinabang.

"Pagdating sa mga benepisyong gaya ng SRA at Hazard Pay - SANA ALL. Ito ang palagi kong sinasabi at ipinaglalaban dahil pareho ang peligro na sinusuong araw-araw ng lahat ng nagtatrabaho sa mga ospital at quarantine facilities, ayon kay Marcos.

Kinalulungkot ni Marcos ang naaantalang mga benepisyo sa mga non-medical at outsourced staff samantalang sila ay tinuturing na essential frontline workers.

"Ang mga guwardiya, janitor, mga non-medical staff sa mga laboratoryo at iba pang support staff sa isang ospital ay itinuturing rin na mga frontline workers pero bakit maging sila ay delayed rin sa pagtanggap ng mga benepisyo?," dagdag ni Marcos.

"Kailangan pa bang mag-aklas ng ating mga frontliners para lang mapansin ng pamahalaan? Hindi dapat ganito. At ang mga ahensiyang gaya ng DoH ay dapat masigurong naaalagaan ang kanilang kapakanan," ayon pa sa dating Senador.

"Dapat gawing prayoridad ng pamahalaan ang mga panukalang batas na magpapalawak sa saklaw ng SRAs at hazard pay at iba pang benepisyo para sa mga healthcare workers. Bayani sila kung ating ituring, kaya't ipakita natin ang ating pasasalamat sa mga sakripisyo nila sa pamamagitan ng pagbigay ng mga benepisyong nararapat nilang matanggap," pagdidiin ni Marcos.

Tinuran pa ni Marcos ang lumalaking dami ng mga ospital na nababawasan ng health staff dahil marami sa mga ito ay nagkakasakit ng COVID-19 o umaalis na sa serbisyo sanhi ng hindi na makayang bigat ng trabaho.

Dalawang magkahiwalay na panukalang batas ang inihain na sa Senate at House of Representatives na naglalayong bigyan ng SRA ang lahat ng mga public and private health workers sa panahon ng pandemya.
